

Survey Instrument

Discrete Choice Experiment on Vaccination Timing Preferences
Wuhan, China (Data Collection Period)

A. Introduction and Instructions

Welcome to this survey about COVID-19 vaccination preferences.

This survey asks you to make choices between different hypothetical COVID-19 vaccine options. There are no right or wrong answers—we are interested in understanding your preferences.

How to complete this survey:

- You will see **6 choice tasks**
- Each task presents **two vaccine alternatives (A and B)** and an option to **choose neither**
- Each vaccine is described by 5 attributes: waiting time, effectiveness, side effects, origin, and cash incentive
- Please select the option you would prefer if these were your real choices

Your responses are confidential and will only be used for research purposes.

Estimated time: 10–15 minutes
