Source of support: This research was conducted without dedicated external funding.

Conflicts of interest: The authors declare no conflicts of interest.

Word counts: Abstract: 168 words; Manuscript body: 4,253 words (excluding abstract, references, and tables).

Number of figures: 1

Number of tables: 2

Supplementary material: Online supplement (31 pages, 7 tables, 2 figures)

Table of contents summary:

A hybrid approach anchoring LLM-generated probabilities to a DCE-derived empirical frontier improves behavioral consistency without model retraining.
